## EXECUTIVE SUMMARY

Government reports are lengthy, cumbersome, and sometimes misleading documents. At Truth in Accounting (TIA), we believe that taxpayers and citizens deserve easy-to-understand, truthful, and transparent financial information from their governments.

This is our second Financial State of the Cities (FSOC) report, a comprehensive analysis of the fiscal health of the nation's most populous cities based on fiscal year 2016 comprehensive annual financial reports. This year, we have expanded our study to include the 75 most populated cities.

At the end of the FY 2016, 64 cities did not have enough money to pay all of their bills. This means that to balance the budget, elected officials have not included the true costs of the government in their budget calculations and have pushed costs onto future taxpayers. TIA divides the amount of money needed to pay bills by the number of city taxpayers to come up with the Taxpayer Burden™. If there is a surplus, that number is likewise divided by the number of taxpayers to come up with the Taxpayer Surplus™. We then rank the cities based on these measures.

We have also implemented a grading system for the cities to give greater context to each city's Taxpayer Burden or Taxpayer Surplus. Based on our grading methodology, no cities received an A, 11 received B's, 23 received C's, 34 received D's, and seven cities received an F.

However, TIA was unable to rank and grade two of the most populous cities—Newark and Jersey City in New Jersey—because they do not issue annual financial reports that follow generally accepted accounting principles, or GAAP. As a result, TIA included the next two most populated municipalities: Fort Wayne, Ind., and Irvine, Calif.

Cities in general do not have enough money to pay their bills. Based on our analysis, the total unfunded debt among the 75 most populous cities amounts to \$335.4 billion. Most of this debt comes from unfunded retiree benefit promises, such as pension and retiree healthcare debt. This year, pension debt accounts for \$210.7 billion, and other post-employment benefits—mainly retiree healthcare liabilities—totaled \$119.5 billion.

## INTRODUCTION AND BACKGROUND

Because government financial statements do not report all liabilities, elected officials and citizens are making financial decisions without knowing the true financial condition of their government. The lack of accuracy and transparency in government accounting prevents even an experienced user of government financial documents from understanding and evaluating a public-sector entity's financial health.

TIA believes it is imperative to provide an honest accounting of each city's financial condition. Therefore, we developed a sophisticated model to analyze all the assets and liabilities of the nation's 75 most populous cities, including unreported liabilities. This is the second year TIA has released an annual FSOC study, documenting the truth about each city's financial position.

Since all levels of government derive their just powers from the consent of the governed, government officials are responsible for reporting their actions and the results in ways that are truthful and comprehensible to the electorate. Providing accurate and timely information to citizens and the media is an essential part of government responsibility and accountability. The lack of transparency in financial information, city budgets, and financial reports makes it difficult for governments to meet this democratic responsibility.

This is the motivation and foundation for the nonpartisan mission of TIA: to educate and empower citizens with understandable, reliable, and transparent government financial information. TIA is a nonprofit, politically unaffiliated organization composed of business, community, and academic leaders interested in improving government financial reporting. TIA makes no policy recommendations beyond improvements to budgeting and accounting practices that will enhance the public's understanding of government finances.

## 75 CITY RANKING (in order)

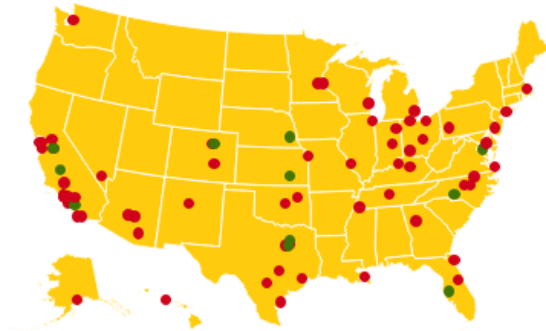

1. Irvine, CA, pg. 28
2. Stockton, CA, pg. 30
3. Lincoln, NE, pg. 32
4. Charlotte, NC, pg. 34
5. Aurora, CO, pg. 36
6. Plano, TX, pg. 38
7. Arlington, TX, pg. 40
8. Washington, DC, pg. 42
9. Fresno, CA, pg. 44
10. Tampa, FL, pg. 46
11. Raleigh, NC, pg. 48
12. Greensboro, NC, pg. 50
13. Wichita, KS, pg. 52
14. Louisville, KY, pg. 54
15. Bakersfield, CA, pg. 56
16. Tulsa, OK, pg. 58
17. Corpus Christi, TX, pg. 60
18. Las Vegas, NV, pg. 62
19. Oklahoma City, OK, pg. 64
20. Long Beach, CA, pg. 66
21. Chula Vista, CA, pg. 68
22. Anchorage, AK, pg. 70
23. Henderson, NV, pg. 72
24. Fort Wayne, IN, pg. 74
25. Riverside, CA, pg. 76
26. San Antonio, TX, pg. 78
27. Colorado Springs, CO, pg. 80
28. Santa Ana, CA, pg. 82
29. Austin, TX, pg. 84
30. Orlando, FL, pg. 86
31. Indianapolis, IN, pg. 88
32. Sacramento, CA, pg. 90
33. El Paso, TX, pg. 92
34. Albuquerque, NM, pg. 94
35. Denver, CO, pg. 96
36. Phoenix, AZ, pg. 98
37. Anaheim, CA, pg. 100
38. San Diego, CA, pg. 102
39. Toledo, OH, pg. 104
40. Columbus, OH, pg. 106
41. Saint Paul, MN, pg. 108
42. Cleveland, OH, pg. 110
43. Virginia Beach, VA, pg. 112
44. Lexington, KY, pg. 114
45. Mesa, AZ, pg. 116
46. Seattle, WA, pg. 118
47. Los Angeles, CA, pg. 120
48. Jacksonville, FL, pg. 122
49. Omaha, NE, pg. 124
50. Memphis, TN, pg. 126
51. Minneapolis, MN, pg. 128
52. Detroit, MI, pg. 130
53. Milwaukee, WI, pg. 132
54. Tucson, AZ, pg. 134
55. Kansas City, MO, pg. 136
56. San Jose, CA, pg. 138
57. Baltimore, MD, pg. 140
58. Atlanta, GA, pg. 142
59. Houston, TX, pg. 144
60. Boston, MA, pg. 146
61. Miami, FL, pg. 148
62. Fort Worth, TX, pg. 150
63. Cincinnati, OH, pg. 152
64. Nashville, TN, pg. 154
65. Honolulu, HI, pg. 156
66. St. Louis, MO, pg. 158
67. Pittsburgh, PA, pg. 160
68. New Orleans, LA, pg. 162
69. Oakland, CA, pg. 164
70. Portland, OR, pg. 166
71. Dallas, TX, pg. 168
72. San Francisco, CA, pg. 170
73. Philadelphia, PA, pg. 172
74. Chicago, IL, pg. 174
75. New York City, NY, pg. 176

## 75 CITY RANKING (alphabetical)

1. Albuquerque, NM, pg. 94
2. Anaheim, CA, pg. 100

75. Wichita, KS, pg. 52

## SUMMARY OF FINDINGS

### 64 cities do not have enough money to pay their bills

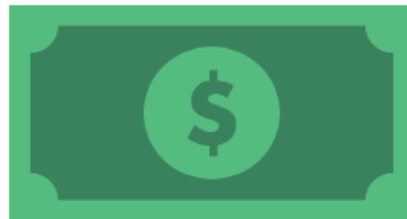

Sixty-four of the 75 most populous U.S. cities do not have enough money to pay all of their bills. This means that to balance their budgets, elected officials have not included the true costs of the government in their budget calculations and have pushed costs onto future taxpayers.

When cities do not have enough money to pay their bills, TIA takes that number and divides it by the estimated number of city taxpayers. We call the resulting number Taxpayer Burden and rank the cities based on this measure.

The best (green) and worst (red) cities have been highlighted.

### \$335.4 billion in unfunded debt

The vast majority of cities analyzed in this report do not have enough money to pay their bills, and they have racked up significant amounts of debt. In total, unfunded debt among the cities was \$335.4 billion at the end of the 2016 fiscal year.

### \$210.7 billion in pension debt

Unfunded pension liabilities are a major contributing factor to the \$335.4 billion in total municipal debt.

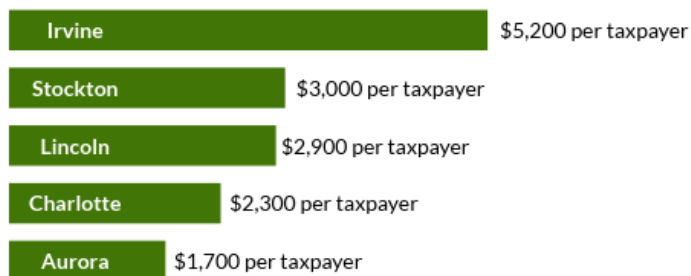

One of the ways cities help make their budgets look balanced is by shortchanging public pension funds. This practice has resulted in a \$210.7 billion shortfall.

[www.statedatalab.org](http://www.statedatalab.org)

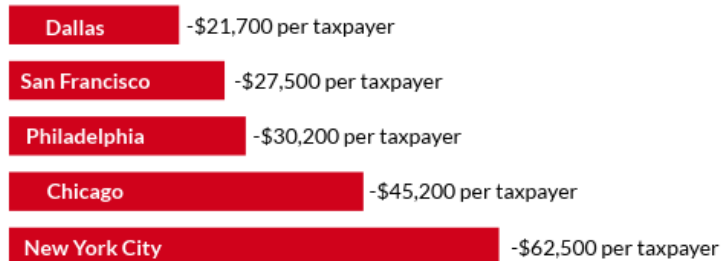

## THE SUNSHINE AND SINKHOLE CITIES

TIA ranks each city by its Taxpayer Burden or Taxpayer Surplus. The Taxpayer Burden is the amount of money each taxpayer would have to contribute if the city were to pay off all of its debt. Conversely, the Taxpayer Surplus is the amount of money left over after all bills are paid, divided by the estimated number of taxpayers in the city. We split the cities into two groups. Cities that lack the necessary funds to pay their bills are called Sinkhole Cities, while those that do have enough money are referred to as Sunshine Cities.

### TOP 5 SUNSHINE CITIES

### BOTTOM 5 SINKHOLE CITIES

This year, there were 64 Sinkhole Cities and 11 Sunshine Cities. The full 75-city ranking can be found on page 12. A full report for each city can be found at [www.statedatalab.org](http://www.statedatalab.org) by hovering over the "city data" tab and then clicking on your city.

[www.truthinaccounting.org](http://www.truthinaccounting.org)

## REPORT FINDINGS: THE SUNSHINE CITIES

**Irvine** has a Taxpayer Surplus that stands at \$5,200. There are very few U.S. cities that are free of bonded debt, and Irvine is one of them. The city now recognizes about \$111 million in unfunded pension debt on its balance sheet and has enough assets outside of its pension system to pay for promised benefits.

**Stockton** finds itself in a much better fiscal position since a judge ruled the city was eligible for Chapter 9 bankruptcy protection in 2013. Stockton was facing a staggering debt burden, but creditors agreed to debt relief. Stockton now has more than enough assets to pay its bills, and the city's overall economy is recovering.

**Lincoln** enjoys a Taxpayer Surplus of \$2,900. Roughly one-quarter of the city's \$315.2 million in bills is related to unfunded pension and retiree healthcare benefits, but the city has more than enough assets to pay its bills. Responsible financial management caused unfunded employee benefit promises to amount to just a sliver of bonded debt, in contrast to many cities around the country.

**Charlotte** residents can thank their city officials for consistently not spending more than its incoming revenue over the last decade. The city's 840,000 people face more than \$700 million in unfunded pension and retiree healthcare obligations for city government employees. However, Charlotte's discipline has helped it accumulate more than enough assets to pay the present value of its bills.

**Aurora** has an excellent track record of spending within its means. Expenses consistently have been running below grant, fee, and general revenue in the last 10 years—even during the years of the Great Recession.

## REPORT FINDINGS: THE SINKHOLE CITIES

**Dallas** has accumulated a significant debt burden for its residents and taxpayers, despite a relatively favorable economic environment in the state of Texas over the past 15 years. Our analysis shows nearly \$8 billion in “money needed to pay bills,” or about \$21,700 for every individual income taxpayer in the city.

**San Francisco** has one of the highest Taxpayer Burdens at \$27,500, and it has massive unfunded obligations that are roughly equally divided among pension and retiree healthcare benefits.

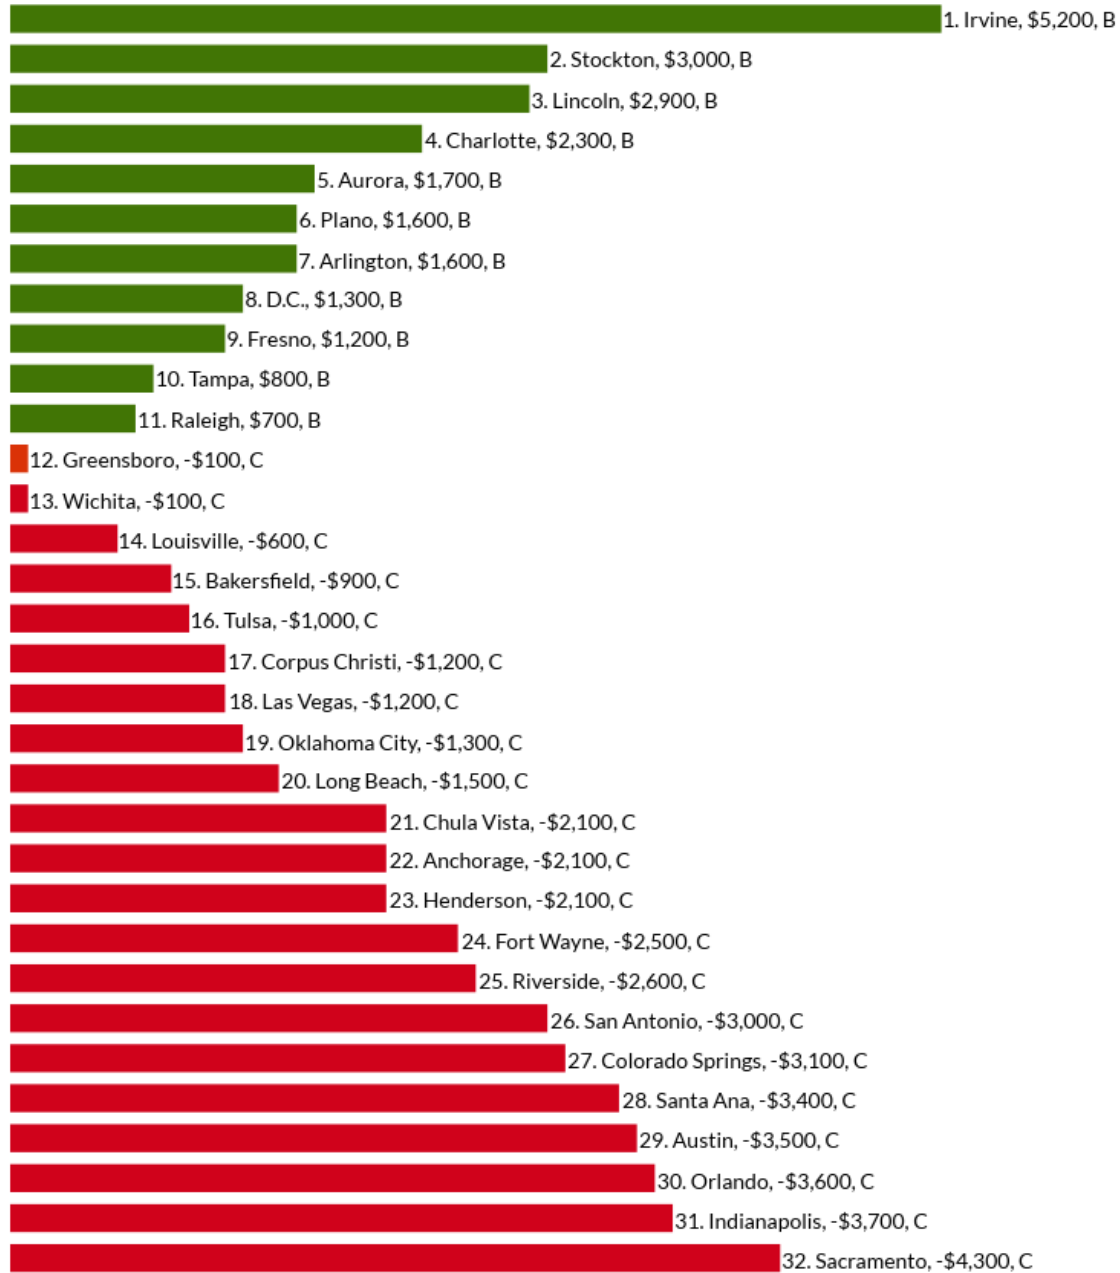

**Philadelphia** remains one of the most financially troubled cities in the country. Looking across the 50 states, there is a tendency for cities in older states to have accumulated higher unfunded debts per taxpayer than cities in newer states, and Philly is no exception to the rule. At \$30,200, Philadelphia’s Taxpayer Burden is driven by more than \$10 billion in unfunded pension obligations.

**Chicago** has bequeathed its residents and taxpayers the second worst financial condition among the 75 most populous U.S. cities. While the city has improved its position with respect to retiree healthcare benefits, it still faces the problem of funding nearly \$36 billion in unfunded pension obligations.

**New York City** ranks last because of its massive, growing debts. Despite elected officials’ long-standing claims of “balanced budgets,” the city has about \$70 billion in unfunded pension benefits, and nearly \$80 billion in retiree healthcare debt.

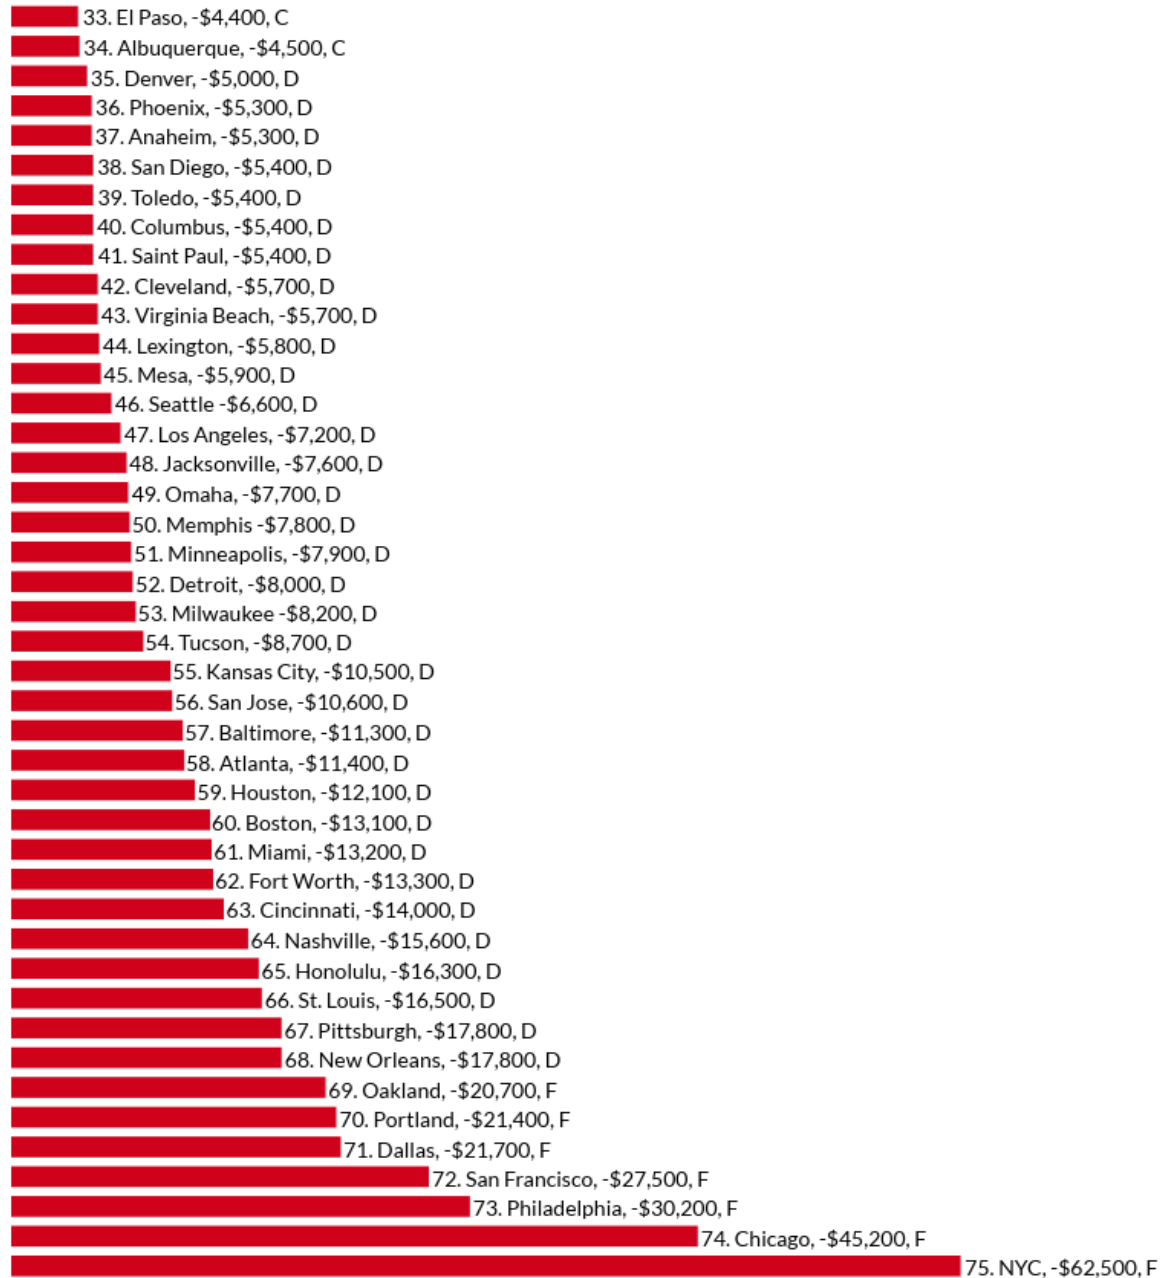

## 75 CITY RANKING

Green is a Sunshine City and red is a Sinkhole City

[www.statedatalab.org](http://www.statedatalab.org)

## 75 CITY RANKING

## REPORT FINDINGS: TIA GRADES THE CITIES

In our second FSOC, we have implemented a grading system for the cities to give greater meaning to each city's Taxpayer Burden or Taxpayer Surplus. A government receives a C or passing grade if it comes close to meeting its balanced budget requirement, which is reflected by a small Taxpayer Burden. A and B grades are given to governments that have met their balanced budget requirements and have a Taxpayer Surplus. D and F grades apply to governments that have not balanced their budgets and have significant Taxpayer Burdens. Based on our grading system, here are the numbers of cities for each grade:

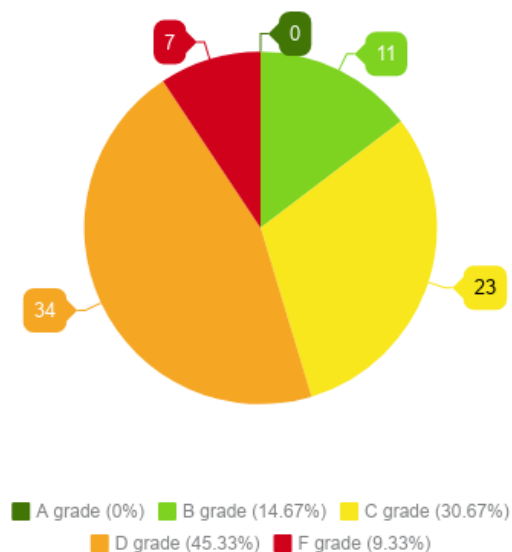

**A grade:** Taxpayer Surplus greater than \$10,000 (0 cities).

**B grade:** Taxpayer Surplus between \$100 and \$10,000 (11 cities).

**C grade:** Taxpayer Burden between \$0 and \$4,900 (23 cities).

**D grade:** Taxpayer Burden between \$5,000 and \$20,000 (34 cities).

**F grade:** Taxpayer Burden greater than \$20,000 (7 cities).

## **REPORT FINDINGS: DOES YOUR CITY BALANCE ITS BUDGET?**

If a city has a balanced budget requirement, it makes sense that this would mean spending is equal to revenue brought in during a specific year. Unfortunately, in the world of government accounting, things are often not as they appear.

All of the 75 most populous U.S. cities have balanced budget requirements. Yet these cities have accumulated a combined \$335.4 billion in debt. How can cities rack up debt and balance their budgets at the same time? It all depends on how you count.

Cities balance budgets using accounting tricks, such as the following:

- Inflating revenue assumptions
- Counting borrowed money as income
- Understating the true costs of government
- Delaying the payment of current bills until the start of the next fiscal year so they aren't included in the calculations

The most common accounting trick cities use is hiding a large portion of employee compensation off the balance sheet and budget. Employee compensation packages include benefits such as healthcare, life insurance, and pensions. Cities become obligated to pay these benefits as employees earn them.

Although these retirement benefits will not be paid until the employees retire, they still represent current compensation costs because they were earned and incurred throughout the employees' tenure. Furthermore, that money needs to be put into the pension fund in order to accumulate investment earnings. If cities didn't offer pensions and other benefits, they would have to compensate their employees with higher salaries from which they would fund their own retirement.

## **REPORT FINDINGS: DOES YOUR CITY BALANCE ITS BUDGET?**

Unfortunately, some elected officials have used portions of the money that is owed to pension funds to keep taxes low, and pay for politically popular programs. This is like charging earned benefits to a credit card without having the money to pay off the debt. Instead of funding promised benefits now, they have been charged to future taxpayers. Shifting the payment of employee benefits to future taxpayers allows the budget to appear balanced, while municipal debt is increasing.

## **REPORT FINDINGS: HOW TIMELY IS YOUR CITY FINANCIAL REPORT?**

Timely information is crucial during government decision processes, such as creating a budget. However, most cities issue their comprehensive annual financial reports (CAFRs) late. The standard for cities to publish their CAFRs is 180 days after the end of the fiscal year. The national average for publishing these reports is roughly 174 days.

In 2016, four of the 75 most populous cities published their financial reports more than 250 days after the fiscal year end. The tardiest city was Baltimore, which took 363 days to release its CAFR. At 97 days, Columbus was the most timely in issuing its report.

Most corporate financial reports are issued within 45 days of their respective fiscal year ends. There are internal difficulties and obstacles for cities to reach this standard; however, timely financial information is critical so citizens and legislators can be knowledgeable participants in crucial decision-making processes, such as voting and budgeting.

## REPORT FINDINGS: HOW TIMELY IS YOUR CITY FINANCIAL REPORT?

Cities that published their financial reports within the 180-day deadline are considered timely. This figure represents the number of days it took the city to publish its financial report after the end of the fiscal year. Here are the cities that reported their financials on time.

### MOST TIMELY

City	Days Issued After FYE
Columbus	97
Plano	104
Washington, DC	117
Raleigh	118
Pittsburgh	118

### TIMELY

City	Days Issued After FYE
Henderson	120
Charlotte	123
Greensboro	123
Nashville	123
New York City	123
Irvine	130
Riverside	132
Portland	138
San Jose	140
Oklahoma City	141
San Francisco	141
Arlington	144
Lexington	145
Denver	146
Houston	153
Virginia Beach	154
Aurora	157
San Diego	159
Minneapolis	159
Tulsa	160
Santa Ana	160
Austin	161
Colorado Springs	163

City	Days Issued After FYE
Bakersfield	165
Chula Vista	167
Albuquerque	168
Mesa	168
Oakland	169
Phoenix	172
Anaheim	173
Atlanta	173
Tampa	174
Las Vegas	175
Orlando	175
Memphis	175
Lincoln	176
Louisville	176
Sacramento	176
Saint Paul	177
Wichita	178
Long Beach	178
Fort Wayne	178
Indianapolis	178
Cleveland	178
Fort Worth	178
Omaha	180
Honolulu	180

## REPORT FINDINGS: HOW TIMELY IS YOUR CITY FINANCIAL REPORT?

Here are the cities that did not publish their financial reports within the 180-day deadline.

### TARDY

City	Days Issued After FYE
El Paso	181
Toledo	181
Miami	181
New Orleans	181
Chicago	181
Boston	182
Cincinnati	183
Stockton	184
Kansas City	184
Jacksonville	201
Fresno	203
St. Louis	204
Corpus Christi	206
Milwaukee	208
Tucson	211
Anchorage	212
Los Angeles	221
Seattle	223

### MOST TARDY

City	Days Issued After FYE
Baltimore	363
Detroit	330
Dallas	266
San Antonio	252
Philadelphia	239

## REPORT FINDINGS: RETIREE HEALTHCARE DEBT REPORTING RULE WILL TAKE EFFECT IN TWO YEARS

In fiscal year 2018, a new rule will be implemented that requires cities to report their retiree healthcare debt on their balance sheets. Our study found 21.3 percent of all promised retiree healthcare benefits—totaling \$119.5 billion—was not reported on cities' balance sheets in FY16.

The following chart shows the difference in reported vs. total unfunded retiree healthcare debt among the Bottom 5 Sinkhole Cities. As you can see, there is a significant difference between what cities currently owe and what they are actually reporting. With the impending change in the GASB reporting standard, cities' reported retiree healthcare liabilities likely will balloon, and their reported net positions will dramatically decrease.

Bottom 5 cities	Reported	Total	Difference
46. Dallas	\$252.2 million	\$492.9 million	\$240.7 million
47. San Francisco	\$2.1 billion	\$4.2 billion	\$2.1 billion
48. Philadelphia	\$682.8 million	\$2.4 billion	\$1.7 billion
49. Chicago	\$167.2 million	\$715.5 million	\$548.3 million
50. New York City	\$97.0 billion	\$79.4 billion	\$17.6 billion

## **WHY IS TRUTHFUL, TRANSPARENT, AND TIMELY INFORMATION IMPORTANT?**

Democracy depends on an informed electorate, but due to current practices in both accounting and budgeting, the true financial health of a city can be obscured and citizens are deceived, or at best misled. Without access to truthful, timely, and transparent information, how can citizens be knowledgeable participants in their governments?

Accurate accounting requires all expenses to be reported in the city's budget and financial statements when incurred, not when they are paid. Truthful budgetary accounting must incorporate all current compensation costs, including the portion of retiree benefits that employees earn every year.

A lack of transparency in government finance leads to the following problems:

- Accounting tricks allow elected officials to claim balanced budgets, giving residents a false sense of security, while cities sink further into debt.
- Residents do not know the true cost of their city government, and elected officials are able to spend amounts larger than the city's revenues.
- Complex pension systems, which both citizens and elected officials have difficulty understanding, rack up massive debts, putting cities further in the red.
- Voters re-elect leaders based on false claims that budgets were balanced.
- Elected officials create and continue new programs and increased services without knowing the true cost of government spending.
- Our representative form of government is undermined because citizens become cynical and do not trust their governments.

Cities should use financial reports from the previous year to calculate a more accurate and realistic budget for the following year. However, because financial reports are not timely, they cannot be used to assist the budgeting process. Furthermore, these budgets do not include all costs—they exclude large portions of compensation costs because money is not set aside to cover retirement benefits as they are earned. Thanks to a new accounting standard, GASB 68, most of the pension debt is now being reported on the face of government balance sheets.

## **WHY IS TRUTHFUL, TRANSPARENT, AND TIMELY INFORMATION IMPORTANT?**

Some cities, however, continue to play number games with pension debt, using the previous year's numbers even though current data is available. Cities also continue not to report the full cost of retiree healthcare debt in their budgets and balance sheets.

Cities' efforts to climb out of their current financial holes must begin with honest government accounting and budgeting. Only then can we debate and develop responsible alternatives to place the cities on stable financial footing. As the saying goes, "If you can't measure it, you can't manage it." How can cities begin to find solutions to crushing debt if they don't know how much debt there is?

## **REPORT FINDINGS: BRING FULL ACCRUAL CALCULATIONS AND TECHNIQUES (FACT) TO BUDGETING**

Budgeting based on Full Accrual Calculations and Techniques (FACT) requires governments to include expenses in their budgets when they are incurred, regardless of when they are paid. If a government promises pension benefits in the current period and must pay retirement claims in future periods, the liability and expense are recorded in the budget when the benefit is promised and earned. When the cash is actually paid, the liability is removed. This straightforward standard is a widely accepted private-sector norm.

FACT-based budgeting allows everyone to have complete knowledge of the financial health of their governments. FACT-based budgeting also provides information to future taxpayers about bills for services that they never have received or will receive.

FACT-based budgeting's benefits include the following:

- Citizens learn the long-term effects of politicians' current decisions.
- Politicians would have more difficulty hiding costs.
- Finances would be more transparent.

Through FACT-based budgeting, elected officials and citizens would have access to the true financial condition of their governments and be better equipped to make political and economic decisions both at the governmental level and in the voting booth.

## REPORT FINDINGS: RECOMMENDATIONS

### Recommendations to citizens:

1. To better understand your city's finances, visit [www.statedatalab.org](http://www.statedatalab.org) and select your city to see your government's true financial condition.
2. Encourage your politicians to balance the budget truthfully.
3. Promote accountability of your elected officials by demanding the use of FACT-based budgeting.

### Recommendations to elected officials:

1. Use FACT-based budgeting.
2. Determine the true debt of the city, including all post-employment benefit programs.
3. Stop claiming to balance the budget while putting off expenses into the future, placing a larger debt onto incoming generations.
4. To gain a more accurate picture of your government's financial condition, download your city's FSOC on [www.statedatalab.org](http://www.statedatalab.org).
5. Encourage city financial information to be provided to taxpayers in a more timely fashion.

### Recommendations to government financial report preparers:

1. Release financial reports on time.
2. Use the most recent pension data, not the previous year's even if this requires a delay in issuing the government CAFR.

### Recommendations to standard setters:

1. Require governments to use the most recent pension data.

## REPORT FINDINGS: METHODOLOGY

TIA researchers use a thorough and holistic approach to determine the condition of government finances. This approach compares bills—including those related to retirement systems, and excluding debt related to capital assets such as land, buildings, and infrastructure—to government assets available to pay these bills. We exclude capital assets because these should not be sold to pay bills.

Historically, state and local governments were not required to record the present value of their obligations for public employee retirement benefits, including pensions and retiree healthcare, as liabilities on their balance sheet. TIA digs into the underlying reports for hundreds of pension and related plans to find these liabilities, and then puts that information on our own version of what constitutes a valid balance sheet.

TIA ranks each city by its Taxpayer Burden or Taxpayer Surplus. The Taxpayer Burden is the amount each taxpayer would have to pay to leave the city free of excessive debt. We calculate this number by subtracting “total bills” from “assets available to pay bills,” and then take the resulting number, or “money needed to pay bills,” and divide it by the estimated number of taxpayers with a positive federal income tax liability. Conversely, a Taxpayer Surplus is each taxpayer’s share of the city’s assets after all bills have been paid.

This year we have added letter grades to our analysis of state and local governments’ financial conditions. These letter grades provide a summary measure supplementing the bottom-line dollar amount reported in our Taxpayer Burden calculation. Our letter grades also provide a valuable alternative to the widely reported letter grades issued by credit rating agencies. We believe government officials and the media have become too reliant on credit ratings. These ratings focus on the needs of bondholders and reflect a government’s ability to pay bonds with little consideration of other sources of government debt, such as unfunded pension liabilities.

It should also be noted that our rankings are based on reporting entities. City/state legal and financial relationships differ across the 50 states. For example, some cities include school systems in their consolidated results, others do not.

## CONCLUSION

Truth in Accounting's second annual Financial State of the Cities report found 64 of the 75 most populous U.S. cities do not have enough money available to pay all of their bills. The total amount of combined municipal unfunded debt of cities analyzed in this report stands at a staggering \$335.4 billion. Of that, unfunded pension liabilities account for \$210.7 billion and retiree healthcare debt another \$119.5 billion.

While none of the 75 most populous cities received an A grade, 11 cities earned a B for their Taxpayer Surplus. The remaining cities had a Taxpayer Burden and varied along the grading system, with 23 cities earning C's, 34 earning D's and seven earning an F grade. TIA was unable to rank and grade two of the most populous cities—Newark and Jersey City in New Jersey—because they do not issue annual financial reports that follow generally accepted accounting principles, or GAAP. As a result, TIA included the next two most populated municipalities: Fort Wayne, Ind., and Irvine, Calif.

You can find more information about each city analyzed in this report by visiting [www.statedatalab.org](http://www.statedatalab.org) and clicking on the “city data” tab at the top of the page.

# IRVINE FINANCES ARE BEST

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF IRVINE

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Irvine ranks No. 1, earning it a "B" on TIA's grading scale.

Unlike most cities, Irvine's elected officials have only promised the amount of benefits they can afford to pay. Because of this, Irvine has enough money to pay all of its bills. When broken down, the amount available to pay future bills results in a surplus of \$5,200 for each Irvine taxpayer.

While Irvine has \$111.2 million in unfunded pension benefits and \$5.3 million in unfunded retiree healthcare benefits, the city has assets outside these retirement systems that could be used to cover these promised benefits. To reduce the unfunded obligations, the city could move additional available assets into its retirement systems.

Although Irvine has enough money to pay all of its bills, it is still not completely transparent with taxpayers. New accounting rules issued by the Governmental Accounting Standards Board require state and local governments to disclose all pension debt on their balance sheets. However, when it comes to retiree healthcare benefits, Irvine is hiding \$3.5 million from taxpayers.

# IRVINE FINANCIAL BREAKDOWN

## FAST FACTS

- + Irvine has \$609.7 million available in assets to pay \$195.6 million worth of bills.
- + The outcome is a \$414.2 million surplus, which breaks down to \$5,200 per taxpayer.
- + Despite reporting all of its pension debt, the city hides most of its retiree healthcare debt. The city's total hidden debt amounts to \$3.5 million.

### THE CITY'S ASSETS EXCEED ITS BILLS

Assets	\$2,676,658,000
<i>Minus:</i> Capital assets	-\$1,566,452,000
Restricted assets	-\$500,474,000
Assets available to pay bills	\$609,732,000
<i>Minus:</i> Bills	-\$195,573,000
Money available to pay bills	\$414,159,000
<b>Each taxpayer's share of surplus</b>	<b>\$5,200</b>

### BILLS THE CITY HAS ACCUMULATED

Other liabilities	\$79,127,000
Unfunded pension benefits	\$111,180,000
Unfunded retiree healthcare	\$5,266,000
<b>Bills</b>	<b>\$195,573,000</b>

## GRADE: B

Bottom line: Irvine has enough money to pay its bills, so it has received a "B" for its finances from Truth in Accounting. A "B" grade is given to cities with a Taxpayer Surplus™ between \$100 and \$10,000.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable, and transparent government financial information. To be knowledgeable participants in their government and its budget process, citizens need truthful and transparent financial information.

# STOCKTON FINANCES IN GOOD SHAPE

January 2018  
truthinaccounting.org

## THE FINANCIAL STATE OF STOCKTON

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Stockton ranks No. 2, earning it a "B" on TIA's grading scale.

Unlike most cities, Stockton's elected officials have only promised the amount of benefits they can afford to pay. Because of this, Stockton has enough money to pay all of its bills. When broken down, the amount available to pay future bills results in a surplus of \$3,000 for each Stockton taxpayer.

Stockton finds itself in a much better fiscal position since a judge ruled the city was eligible for Chapter 9 bankruptcy protection in 2013. Stockton was facing a staggering debt burden, but creditors agreed to debt relief and Stockton retirees lost their healthcare benefits in the bankruptcy. Stockton now has more than enough assets to pay its bills, and the city's overall economy is recovering.

A new accounting standard implemented last year requires state and local governments to report all of their pension debt on the balance sheet. And in fiscal year 2018, governments will have to disclose unfunded retiree healthcare debt as well. Stockton should be commended because it isn't hiding any debt from taxpayers in its 2016 annual financial report.

# WASHINGTON, D.C. FINANCES STABLE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF WASHINGTON, D.C.

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Washington, D.C., ranks No. 8, earning it a "B" on TIA's grading scale.

Washington, D.C.'s elected officials have only promised the amount of benefits they can afford to pay. Because of this, the district has enough money to pay all of its bills. When broken down, the amount available to pay future bills results in a surplus of \$1,300 for each Washington, D.C., taxpayer.

The district's pension and retiree healthcare plans are extremely well-funded, resulting in a negative unfunded amount. Washington, D.C. endeavors to have enough assets to pay benefits, so the amount of assets attempts to take into account downturns in the market.

Not only does Washington D.C., have enough money to pay all of its bills, the district also isn't hiding any debt from taxpayers. A new accounting standard implemented last year requires state and local governments to report all of their pension debt on the balance sheet. And in fiscal year 2018, governments will have to disclose unfunded retiree healthcare debt as well.

<b>Bills</b>	<b>\$541,656,000</b>

### GRADE: B

Bottom line: Fresno has enough money to pay its bills, so it has received a "B" for its finances from Truth in Accounting. A "B" grade is given to cities with a Taxpayer Surplus™ between \$100 and \$10,000.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable, and transparent government financial information. To be knowledgeable participants in their government and its budget process, citizens need truthful and transparent financial information.

# TAMPA FINANCES IN GOOD SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF TAMPA

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Tampa ranks No. 10, earning it a "B" on TIA's grading scale.

Unlike most cities, Tampa's elected officials have only promised the amount of benefits they can afford to pay. Because of this, Tampa has enough money to pay all of its bills. When broken down, the amount available to pay future bills results in a surplus of \$800 for each Tampa taxpayer.

Although Tampa has enough money to pay all of its bills, it is still not completely transparent with taxpayers. New accounting rules issued by the Governmental Accounting Standards Board require state and local governments to disclose all pension debt on their balance sheets. However, Tampa is still hiding more than half of its retiree healthcare debt.

# RALEIGH FINANCES IN GOOD SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF RALEIGH

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Raleigh ranks No. 11, earning it a "B" on TIA's grading scale.

Unlike most cities, Raleigh's elected officials have only promised the amount of benefits they can afford to pay. Because of this, Raleigh has enough money to pay all of its bills. When broken down, the amount available to pay future bills results in a surplus of \$700 for each Raleigh taxpayer.

Although Raleigh has enough money to pay all of its bills, it is still not completely transparent with taxpayers. New accounting rules issued by the Governmental Accounting Standards Board require state and local governments to disclose all pension debt on their balance sheets. However, since government officials use outdated pension data, Raleigh is still hiding 88 percent of its pension debt. Furthermore, 98 percent of its retiree healthcare debt is also hidden.

# GREENSBORO FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF GREENSBORO

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Greensboro ranks No. 12, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$7.4 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$100 for every Greensboro taxpayer.

While Greensboro has \$83.8 million in unfunded pension benefits and \$75.1 million in unfunded retiree healthcare benefits, the city has assets outside these retirement systems that could be used to cover all but \$7.4 million of these promised benefits. To reduce the unfunded obligations, the city could contribute additional available assets into its retirement systems.

It is alarming that city government officials continue to hide significant amounts of retirement debt from their financial statements, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health. Greensboro hides the vast majority of its pension and retiree healthcare liabilities from its balance sheet.

# BAKERSFIELD FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF BAKERSFIELD

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Bakersfield ranks No. 15, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$107.1 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$900 for every Bakersfield taxpayer.

Bakersfield's overall debt largely consists of entitlement obligations in the form of pension benefits. The city has \$322.6 million in unfunded pension promises and \$74.4 million in unfunded retiree healthcare benefits. While Bakersfield has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

## GRADE: C

Bottom line: Las Vegas' Taxpayer Burden™ is less than \$5,000, so it has received a "C" for its finances from Truth in Accounting. While better off than many other cities, Las Vegas still owes more than it owns.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable, and transparent government financial information. To be knowledgeable participants in their government and its budget process, citizens need truthful and transparent financial information.

# OKLAHOMA CITY FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF OKLAHOMA CITY

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Oklahoma City ranks No. 19, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$240.4 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$1,300 for every Oklahoma City taxpayer.

Oklahoma City's overall debt consists largely of bonds payable and entitlement obligations in two categories: pensions and retiree healthcare benefits. The city has \$400.4 million in unfunded pension promises and \$401.8 million in unfunded retiree healthcare benefits. While Oklahoma City has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

# OKLAHOMA CITY FINANCIAL BREAKDOWN

## FAST FACTS

- + Oklahoma City has \$1 billion available in assets to pay \$1.3 billion worth of bills.
- + The outcome is a \$240.4 million shortfall and a \$1,300 Taxpayer Burden™.
- + Despite reporting most of its pension debt, the city hides most of its retiree healthcare debt. The city's total hidden debt amounts to \$382.2 million.

### THE CITY'S BILLS EXCEED ITS ASSETS

# LONG BEACH FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF LONG BEACH

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Long Beach ranks No. 20, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$214.4 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$1,500 for every Long Beach taxpayer.

Long Beach's overall debt largely consists of bonds payable and entitlement obligations in the form of pension benefits. The city has \$1.1 billion in unfunded pension promises and \$45.1 million in unfunded retiree healthcare benefits. While Long Beach has promised these benefits, little money has been set aside to fund them.

A new accounting standard implemented last year requires state and local governments to report all of their pension debt on the balance sheet. And in fiscal year 2018, governments will have to disclose unfunded retiree healthcare debt as well. Long Beach should be commended because it isn't hiding any debt from taxpayers in its 2016 annual financial report.

# ANCHORAGE FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF ANCHORAGE

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Anchorage ranks No. 22, earning it a "C" on TIA's grading scale.

Repeated decisions by city officials have left the city with a debt burden of \$244.9 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$2,100 for every Anchorage taxpayer.

Anchorage's financial problems are largely driven by entitlement obligations in the form of pension benefits. The city has \$1.1 billion in unfunded pension promises and \$133.3 million in unfunded retiree healthcare benefits. While Anchorage has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

# RIVERSIDE FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF RIVERSIDE, CALIF.

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Riverside ranks No. 25, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$257.1 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$2,600 for every Riverside taxpayer.

Riverside's financial problems are largely driven by entitlement obligations in the form of pension benefits. The city has \$435.2 million in unfunded pension promises and \$40.2 million in unfunded retiree healthcare benefits. While Riverside has promised these benefits, little money has been set aside to fund them.

In 2015, government officials increased financial transparency by including the city's pension debt on its balance sheet. Unfortunately, 20 percent of Riverside's unfunded retiree healthcare debt is still not reported. With additional changes to accounting standards being implemented in fiscal year 2018, hopefully all retirement debt will be reported.

## GRADE: C

Bottom line: Colorado Springs' Taxpayer Burden™ is less than \$5,000, so it has received a "C" for its finances from Truth in Accounting. While better off than many other cities, Colorado Springs still owes more than it owns.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable, and transparent government financial information. To be knowledgeable participants in their government and its budget process, citizens need truthful and transparent financial information.

# SANTA ANA FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF SANTA ANA

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Santa Ana ranks No. 28, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$362.6 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$3,400 for every Santa Ana taxpayer.

Santa Ana's financial problems are largely driven by entitlement obligations in the form of pension benefits. The city has \$468.7 million in unfunded pension promises and \$39.3 million in unfunded retiree healthcare benefits. While Santa Ana has promised these benefits, little money has been set aside to fund them.

In 2015, government officials increased financial transparency by including the city's pension debt on its balance sheet. Unfortunately, only 26 percent of Santa Ana's unfunded retiree healthcare debt is being reported. With additional changes to accounting standards being implemented in fiscal year 2018, hopefully all retirement debt will be reported.

# SANTA ANA FINANCIAL BREAKDOWN

## FAST FACTS

- + Santa Ana has \$301.6 million available in assets to pay \$664.2 million worth of bills.
- + The outcome is a \$362.6 million shortfall and a \$3,400 Taxpayer Burden™.
- + Despite reporting most of its pension debt, the city hides most of its retiree healthcare debt. The city's total hidden debt amounts to \$29.6 million.

# AUSTIN FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF AUSTIN

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Austin ranks No. 29, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$927.2 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$3,500 for every Austin taxpayer.

Austin's financial problems are largely driven by runaway entitlement obligations in two categories: pensions and retiree healthcare benefits. The city has \$1.8 billion in unfunded pension promises and \$1.5 billion in unfunded retiree healthcare benefits. While Austin has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

# INDIANAPOLIS FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF INDIANAPOLIS

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Indianapolis ranks No. 31, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$1 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$3,700 for every Indianapolis taxpayer.

Indianapolis' financial problems are largely driven by entitlement obligations in the form of pension benefits. The city has \$914.9 million in unfunded pension promises and \$166.4 million in unfunded retiree healthcare benefits. While Indianapolis has promised these benefits, little money has been set aside to fund them.

A new accounting standard implemented last year requires state and local governments to report all of their pension debt on the balance sheet. And in fiscal year 2018, governments will have to disclose unfunded retiree healthcare debt as well. Indianapolis should be commended because it did not hide any retirement debt from its taxpayers in its 2016 annual financial report.

# SACRAMENTO FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF SACRAMENTO

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Sacramento ranks No. 32, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$643.9 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$4,300 for every Sacramento taxpayer.

Sacramento's overall debt consists largely of bonds payable and entitlement obligations in the form of pension benefits. The city has \$730.9 million in unfunded pension promises and \$357.4 million in unfunded retiree healthcare benefits. While Sacramento has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

# EL PASO FINANCES IN DECENT SHAPE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF EL PASO

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. El Paso ranks No. 33, earning it a "C" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$870.6 million, according to TIA's analysis of the city's 2016 financial filings. That burden equates to \$4,400 for every El Paso taxpayer.

El Paso's overall debt primarily consists of bonds payable and entitlement obligations in two categories: pensions and retiree healthcare benefits. The city has \$617.5 million in unfunded pension promises and \$109.7 million in unfunded retiree healthcare benefits. While El Paso has promised these benefits, little money has been set aside to fund them.

The city reports most of its debt on the balance sheet, but it is still not completely transparent with taxpayers. Almost \$53 million of retirement liabilities are excluded, primarily because outdated pension data was used to prepare the financial statements.

## GRADE: D

Bottom line: Phoenix does not have enough money to pay its bills, so it has received a "D" for its finances from Truth in Accounting. A "D" grade is given to cities with a Taxpayer Burden™ between \$5,000 and \$20,000.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable, and transparent government financial information. To be knowledgeable participants in their government and its budget process, citizens need truthful and transparent financial information.

# ANAHEIM FINANCES DISCONCERTING

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF ANAHEIM

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Anaheim ranks No. 37, earning it a "D" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$590.3 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$5,300 for every Anaheim taxpayer.

Anaheim's financial problems are largely driven by long-term debt and entitlement obligations in the form of pension benefits. The city has \$568.4 million in unfunded pension promises and \$191.5 million in unfunded retiree healthcare benefits. While Anaheim has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

# SAN DIEGO FINANCES WORSEN

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF SAN DIEGO

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. San Diego ranks No. 38, earning it a "D" on TIA's grading scale.

Repeated decisions by city officials have left the city with a debt burden of \$2.3 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$5,400 for every San Diego taxpayer. The Taxpayer Burden™ actually increased by \$2,500 since last year, primarily because of growing pension liabilities.

San Diego's financial problems are largely driven by runaway entitlement obligations in the form of pension benefits. The city has \$2.7 billion in unfunded pension promises and \$537.8 million in unfunded retiree healthcare benefits. While San Diego has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

# MESA FINANCES STILL STRUGGLING

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF MESA

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Mesa ranks No. 45, earning it a "D" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$784.6 million, according to TIA's analysis of its 2016 financial filings. That burden equates to \$5,900 for every Mesa taxpayer.

Mesa's financial problems are largely driven by entitlement obligations in two categories: pensions and retiree healthcare benefits. The city has \$691.2 million in unfunded pension promises and \$646.1 million in unfunded retiree healthcare benefits. While Mesa has promised these benefits, little money has been set aside to fund them.

In 2015, government officials increased financial transparency by including the vast majority of the pension debt on the city's balance sheet. Unfortunately, a quarter of Mesa's unfunded retiree healthcare debt is still not reported. With additional changes to accounting standards being implemented in fiscal year 2018, hopefully all retirement debt will be reported.

# MESA

## FINANCIAL BREAKDOWN

### FAST FACTS

- + Mesa has \$903.1 million available in assets to pay \$1.7 billion worth of bills.
- + The outcome is a \$784.6 million shortfall and a \$5,900 Taxpayer Burden™.
- + Mesa reports most of its retirement liabilities on its balance sheet. However, \$170.3 million of pension and retiree healthcare obligations have been excluded.

#### THE CITY'S BILLS EXCEED ITS ASSETS

Assets	\$3,869,701,000
<i>Minus:</i> Capital assets	-\$2,835,486,000
Restricted assets	-\$131,080,000
Assets available to pay bills	\$903,135,000
<i>Minus:</i> Bills	-\$1,687,769,000
Money needed to pay bills	-\$784,634,000
<b>Each taxpayer's share of this debt</b>	<b>-\$5,900</b>

#### BILLS THE CITY HAS ACCUMULATED

Bonds	\$1,675,978,000
Other liabilities	\$242,350,000
<i>Minus:</i> Debt related to capital assets	-\$1,567,817,000
Unfunded pension benefits	\$691,160,000
Unfunded retiree healthcare	\$646,098,000
<b>Bills</b>	<b>\$1,687,769,000</b>

### GRADE: D

Bottom line: Mesa does not have enough money to pay its bills, so it has received a "D" for its finances from Truth in Accounting. A "D" grade is given to cities with a Taxpayer Burden™ between \$5,000 and \$20,000.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable, and transparent government financial information. To be knowledgeable participants in their government and its budget process, citizens need truthful and transparent financial information.

# SEATTLE FINANCES STILL STRUGGLING

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF SEATTLE

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Seattle ranks No. 46, earning it a "D" on TIA's grading scale.

Repeated decisions by city officials have left the city with a debt burden of \$1.6 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$6,600 for every Seattle taxpayer.

Seattle's financial problems are largely driven by long-term debt and entitlement obligations in two categories: pensions and retiree healthcare benefits. The city has \$1.4 billion in unfunded pension promises and \$734.1 million in unfunded retiree healthcare benefits. While Seattle has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

# MINNEAPOLIS FINANCES WORSEN SIGNIFICANTLY

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF MINNEAPOLIS

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Minneapolis ranks No. 51, earning it a "D" on TIA's grading scale.

Repeated decisions by city officials have left the city with a debt burden of \$1.2 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$7,900 for every Minneapolis taxpayer. The Taxpayer Burden™ actually increased by \$5,600 since last year, primarily because of growing pension liabilities.

Minneapolis's financial problems are largely driven by runaway entitlement obligations in the form of pension benefits. The city has \$1.6 billion in unfunded pension promises and \$38.2 million in unfunded retiree healthcare benefits. While Minneapolis has promised these benefits, little money has been set aside to fund them.

A new accounting standard implemented last year requires state and local governments to report all of their pension debt on the balance sheet. And in fiscal year 2018, governments will have to disclose unfunded retiree healthcare debt as well. Minneapolis should be commended because it didn't hide any debt from taxpayers in its 2016 annual financial report.

# DETROIT FINANCES IMPROVE AFTER BANKRUPTCY

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF DETROIT

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Detroit ranks No. 52, earning it a "D" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$1.8 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$8,000 for every Detroit taxpayer.

Detroit's financial problems are largely driven by runaway pension obligations. The city has \$1.9 billion in unfunded pension promises and \$2.7 million in unfunded retiree healthcare benefits. While Detroit has promised these benefits, little money has been set aside to fund them.

Detroit's financial position has improved in recent years, as evidenced by the decrease of its Taxpayer Burden™ from \$14,100 in 2015 to \$8,000 in 2016. However, the means by which this occurred are not praiseworthy. In 2013, the city filed for bankruptcy and subsequently eliminated \$8.3 billion of debt from its books, including \$5.7 billion of retiree healthcare obligations and \$1.3 billion of pension liabilities. The city also had to lease its regional water and sewer systems.

# MILWAUKEE FINANCES STRUGGLING

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF MILWAUKEE

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Milwaukee ranks No. 53, earning it a "D" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$1.7 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$8,200 for every Milwaukee taxpayer.

Milwaukee's financial problems are largely driven by long-term debt and runaway entitlement obligations in the form of retiree healthcare benefits. The city has \$354 million in unfunded pension promises and \$1 billion in unfunded retiree healthcare benefits. While Milwaukee has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

## GRADE: D

Bottom line: Milwaukee does not have enough money to pay its bills, so it has received a "D" for its finances from Truth in Accounting. A "D" grade is given to cities with a Taxpayer Burden™ between \$5,000 and \$20,000.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable, and transparent government financial information. To be knowledgeable participants in their government and its budget process, citizens need truthful and transparent financial information.

# TUCSON FINANCES STILL STRUGGLING

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF TUCSON

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Tucson ranks No. 54, earning it a "D" on TIA's grading scale.

Repeated decisions by city officials have left the city with a debt burden of \$1.3 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$8,700 for every Tucson taxpayer.

Tucson's financial problems are largely driven by runaway entitlement obligations in the form of pension benefits. The city has \$1.1 billion in unfunded pension promises and \$223.2 million in unfunded retiree healthcare benefits. While Tucson has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

## THE FINANCIAL STATE OF KANSAS CITY, MO.

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Kansas City ranks No. 55, earning it a "D" on TIA's grading scale.

Decisions by city officials have left the city with a debt burden of \$1.6 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$10,500 for every Kansas City taxpayer.

Kansas City's financial problems are largely driven by long-term debt and entitlement obligations in the form of pension benefits. The city has \$896.5 million in unfunded pension promises and \$144.1 million in unfunded retiree healthcare benefits. While Kansas City has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. ## GRADE: D

Bottom line: Fort Worth does not have enough money to pay its bills, so it has received a "D" for its finances from Truth in Accounting. A "D" grade is given to cities with a Taxpayer Burden™ between \$5,000 and \$20,000.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable, and transparent government financial information. To be knowledgeable participants in their government and its budget process, citizens need truthful and transparent financial information.

# CINCINNATI FINANCES STRUGGLING

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF CINCINNATI

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Cincinnati ranks No. 63, earning it a "D" on TIA's grading scale.

Repeated decisions by city officials have left the city with a debt burden of \$1.4 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$14,000 for every Cincinnati taxpayer.

Cincinnati's financial problems are largely driven by runaway entitlement obligations in the form of pension benefits. The city has \$1.6 billion in unfunded pension promises and \$10.1 million in unfunded retiree healthcare benefits. While Cincinnati has promised these benefits, little money has been set aside to fund them.

A new accounting standard implemented last year requires state and local governments to report all of their pension debt on the balance sheet. And in fiscal year 2018, governments will have to disclose unfunded retiree healthcare debt as well. Cincinnati should be commended because it isn't hiding any debt from taxpayers in its 2016 annual financial report.

# NASHVILLE FINANCES IN TROUBLE

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF NASHVILLE

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Nashville ranks No. 64, earning it a "D" on TIA's grading scale.

Repeated decisions by city officials have left the city with a staggering debt burden of \$3.1 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$15,600 for every Nashville taxpayer.

Nashville's financial problems are largely driven by runaway entitlement obligations in the form of retiree healthcare benefits. The city has \$731.4 million in unfunded pension promises and \$3.1 billion in unfunded retiree healthcare benefits. While Nashville has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's just as alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

## FAST FACTS

- + Dallas has \$2.1 billion available in assets to pay \$10 billion worth of bills.
- + The outcome is a \$7.9 billion shortfall and a \$21,700 Taxpayer Burden™.
- + Despite reporting all of its pension debt, the city hides much of its retiree healthcare debt. The city's total hidden debt amounts to \$240.7 million.

### THE CITY'S BILLS EXCEED ITS ASSETS

Assets	\$13,235,431,000
<i>Minus:</i> Capital assets	-\$10,644,971,000
Restricted assets	-\$467,131,000
Assets available to pay bills	\$2,123,329,000
<i>Minus:</i> Bills	-\$10,002,186,000
Money needed to pay bills	-\$7,878,857,000
<b>Each taxpayer's share of this debt</b>	<b>-\$21,700</b>

### BILLS THE CITY HAS ACCUMULATED

Bonds	\$5,478,593,000
Other liabilities	\$1,910,096,000
<i>Minus:</i> Debt related to capital assets	-\$5,141,726,000
Unfunded pension benefits	\$7,262,356,000
Unfunded retiree healthcare	\$492,867,000
<b>Bills</b>	<b>\$10,002,186,000</b>

## GRADE: F

Bottom line: Dallas would need more than \$20,000 from each of its taxpayers to pay all of its bills, so it has received an "F" for its finances from Truth in Accounting.

Truth in Accounting is committed to educating and empowering citizens with understandable, reliable, and transparent government financial information. To be knowledgeable participants in their government and its budget process, citizens need truthful and transparent financial information.

# SAN FRANCISCO DROWNING IN DEBT

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF SAN FRANCISCO

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. San Francisco ranks No. 72, earning them an "F" on TIA's grading scale.

Repeated decisions by city officials have left the city with a staggering debt burden of \$7.5 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$27,500 for every San Francisco taxpayer.

San Francisco's financial problems are largely driven by runaway entitlement obligations in two categories: pensions and retiree healthcare benefits. The city has \$5.7 billion in unfunded pension promises and \$4.2 billion in unfunded retiree healthcare benefits. While San Francisco has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

# PHILADELPHIA'S FINANCES IN TROUBLE

January 2018

[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF PHILADELPHIA

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. Philadelphia ranks No. 73, earning it an "F" on TIA's grading scale.

Repeated decisions by city officials have left the city with a staggering debt burden of \$16.2 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$30,200 for every Philadelphia taxpayer.

Philadelphia's financial problems are largely driven by long-term debt and runaway entitlement obligations in two categories: pensions and retiree healthcare benefits. The city has \$10.3 billion in unfunded pension promises and \$2.4 billion in unfunded retiree healthcare benefits. While Philadelphia has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.

# NEW YORK CITY FINANCES RANK LAST

January 2018  
[truthinaccounting.org](http://truthinaccounting.org)

## THE FINANCIAL STATE OF NEW YORK CITY

Truth in Accounting's (TIA) new city report ranks and grades the 75 most populous cities in the United States by their financial health. New York City ranks last at No. 75 and earned an "F" on TIA's grading scale.

Repeated decisions by city officials have left the city with a staggering debt burden of \$179.3 billion, according to TIA's analysis of its 2016 financial filings. That burden equates to \$62,500 for every New York City taxpayer.

New York City's financial problems are largely driven by long-term debt and runaway entitlement obligations in two categories: pensions and retiree healthcare benefits. The city has \$69.7 billion in unfunded pension promises and \$79.4 billion in unfunded retiree healthcare benefits. While New York City has promised these benefits, little money has been set aside to fund them.

These statistics are jarring, but what's also alarming is that city government officials continue to hide significant amounts of retirement debt from their balance sheets, despite new rules to increase financial transparency. This skewed financial data gives residents a false impression of their city's overall financial health.
